HERIFF'S SALE.—By virtue of a writ of execution, issued from the Circuit Court of Cook County, in favor of [illegible] against the lands and tenements of [illegible] Defendant, and to me directed and delivered, I have levied upon and taken as the property of said defendant in and to the following described real estate, to-wit:

The Tribune.

FRIDAY, JUNE 6, 1862.

THE SOURCE IS THEIR UNION.

To conquer the rebellion in the field, to defeat and disperse the armies of treason; to repossess and occupy all the places, and territory of the Union; and make all within its limits acknowledge and submit to its authority—*forever*; and to effect all such results are, they do not constitute the whole of the duty of the General Government towards secession. The citizens of the South who have revolted and taken up arms against the Union, are not only to be compelled to lay down their weapons, and renew their allegiance to the Union; but they are if possible to be brought to see how great the folly of their course has been; how fraught with evil and mischief to themselves; and made to feel that the success of secession would have been fatal to their best prosperity and interest; while in returning to the Union they are coming back from a wild and mad career of misery and ruin, to the true and only paths of safety and peace. Simply to subjugate the followers of secession, and by main force of arms, to bind them down and break them into a sullen and defiant yielding to overmastering power, is not so desirable; and if attained would be an end of such doubtful good, that all might well shrink from the prospect. If there were no hope that our Southern fellow citizens, who have been stimulated to such fierce and desperate efforts against the Union; and who have flung themselves with such headlong and frantic fury against all the bars and gates that hindered their breaking forth from the sacred halls of their father's house, as from a loathsome and hated dungeon, could be brought back save by sheer strength; and we felt that they must be dragged and forced in again, and then could only be made to remain by being chained down and guarded by armed men, all of us should feel that the future of the Union was gloomy.

Now there is no real reason for any such dark and dismal forebodings; but on the contrary many and cheering indications and proofs, that the brethern who have been so grossly deceived and betrayed, and under the evil suggestions of bad men and their worst passions, have been carried captive into rebellion, will rejoice in being restored again to the old Union; will escape from the thraldom of their wily, treacherous, and wicked leaders as from the snares and power of their worst and most detested foes; and will escape within the defenses of the constitution with an ardor of patriotic loyalty and devotion greatly strengthened and deepened by the terrible sufferings of their unnatural revolt. Not to suppose this is to believe that all the millions who dwell in the South are to be given up to folly and passion; are to be smitten with blindness as with a curse, so that they cannot see where their true interest lies, or seeing it abandon themselves madly to the opposite paths of infamy and destruction. Neither is there any good reason for believing that the people of the Southern States will not come to approve the wisdom of that policy which designs the abolition of Slavery; but on the contrary much to prove that they will not only accept, but will come to demand and clamor for, measures which will secure that end; and secure it in the most speedy and effective manner. In endeavoring to forecast what the future action of the slave States will be on this important subject, we are too prone to mistake the noisy and showy demonstrations of the few aristocrats, whose social position and political power, have been all bred up and are now drawing their life from Slavery, for the genuine and indisputed sentiment of the whole people. But facts, and every man's reason, both show that this is not so. There is a deep seated wide-spread, and ever growing public opinion South, that sympathizes and agrees with the whole North, with all Europe, and with all enlightened men the world over, in the conviction that slavery is an evil, a bane and a blight to any people; that it must be done away with, if any nation that has it would prosper; and the sooner the better. The light that this rebellion has thrown in such a blaze on slavery, only confirms and illustrates this conviction. For it has shown southern Union men that the only real foe of the Union is slavery; and has brought these men slowly, but at last surely to the conclusion, that slavery must be given up if the Union would be preserved, and that the Union is of infinitely the most value. The drift of opinion South is to-day setting strongly towards the restoration of the Union. The people there will demand it soon, and so fixed will they become in that resolve, that slavery or any other institution, or man, or thing, that stands between them and the Union, will be beaten down and destroyed utterly.

REPUDIATING THE FEDERAL CONSTITUTION.

In the second article of the proposed Constitution of Illinois, there is a direct and intentional conflict with both the letter and spirit of the Federal Constitution. The old Articles of Confederation ordained that each State should retain all the powers "which are not by this Confederation *expressly* delegated to the United States." The Convention which drafted the Federal Constitution wholly omitted this article. The State of New Hampshire proposed as an amendment an article containing the words, "not *expressly and particularly delegated*." The italicised words were stricken out of the tenth article of the adopted amendments. But the thirtieth section of the second article of our proposed State Constitution replaces the rejected phrase, "*expressly*."

It will be seen at a glance that the insertion of this word materially changes the meaning of the clause. "Not *expressly* delegated," means, not delegated in *express words*. But "Not delegated," means, not delegated at all, either by express words, by fair inference, by implication, by the objects of the Constitution, or by the necessities of the case. This gives Congress a much wider scope than if confined to the powers delegated to it in *express words*, as under the Articles of Confederation. And such was the avowed intention of the men who framed an instrument designed to create a more "perfect union" between the people of the Republic. The Articles of Confederation had proved a failure, because they had not invested the National Government with power enough to command the obedience of the States, or the respect of foreign nations. The choice lay between one supreme sovereign power and prosperity, and a disjointed league of independent sovereignties and anarchy. The people wisely chose to remove the State barriers which separated them, and to assume absolute control of all matters in which they had a common interest. This resolve they carried out in adopting the Federal Constitution. To prove that they acted with a wise foresight, we need only point to the Southern rebellion, which has grown out of the gradual adhesion of some States to the Articles of Confederation, claiming for themselves sovereign authority within their own limits, and denying to the Federal Government all other powers not *expressly* delegated to it.

The proposed Constitution of Illinois, in defining the powers of the State, passes by the Federal compact and goes for its authority to the Articles of Confederation, interweaving a hypocritical show of respect for the national supremacy. In the first place, it sets forth that Illinois is a "free, sovereign, and independent State;" next, that the State may exercise "every power" which it has not *expressly* delegated to the Federal Government, or which is not prohibited to it by the Constitution of the United States. Now the State is most emphatically prohibited from exercising any of the powers of "independent sovereignty." It may not coin money, nor declare war, nor keep a standing army or navy in time of peace, nor regulate commerce, nor form treaties with foreign powers or with other States. All these prerogatives are necessary to sovereign independence. Moreover, we have already shown that the Federal Government has authority to exercise power not "expressly" delegated to it; but only delegated by fair inference, implication, and the necessities of the case. On no construction less liberal than this could the Government be maintained.

Again, our proposed Constitution declares that the people of Illinois shall forever enjoy and exercise every power not *by them* expressly delegated to the General Government. Now, it is very certain that the people of Illinois did never, through their State organization, or in any separate or distinct capacity, delegate to the General Government any power at all; that sons of its prerogatives are derived from the *States*; but from the Constitution, which was the production of the *whole people* in their sovereign capacity. We doubt whether so much that is absurd, foolish, contradictory and mischievous, was ever before crowded into so small a compass as this thirtieth section.

Our government is founded on the idea of the original sovereignty of the people of the whole nation, not of the separate States. From the people alone all the States and national rights spring, and all reserved rights are reserved to them. This pretended jealousy of central power is a sham. It is not a jealousy for the rights of the people; but a mean hostility to their equal representation in the popular branch of Congress. It is a desire to set up against their power and sovereignties an oligarchy of State sovereignties. The doctrine of State "rights" has never been invoked to protect the rights of the people; but only to increase the usurped power of a domineering caste.

HAYTI RECOGNIZED.

Old conservatism is getting many hard knocks in these times, as it goes hobbling groaningly along in the wake of the progress of our age. Here now is a republic of niggers recognized as a nation by the United States, and these blacks admitted into the charmed circle of governments. Is there no rebuke in this recognition, to our own home system? These blacks once in their not very remote ancestry enjoyed the advantages of the same connection and relations to the white race so gently and carefully conserved by our pro-slavery Generals. But they fell from the grace of chattelhood to the unpoetic and commonplace relation of society implied in "every man for himself." To their present condition they have come through a page in their history that tells of the capacities of the black race to vindicate and fight for their own rights, and now the republic of President Geffrard may show some very respectable figures as the peaceable fruits of Freedom among the blacks. The population is nearly 600,000, their territory consists of 10,000 square miles, or about the same area as Vermont with the population of Maine. Their commercial page with this country alone shows a nearly balancing amount of about three millions in exports and imports. How it will help to restore docility to our blacks and make them the contented cattle they were when they learn as they will that their white lords have actually opened relations of amity and diplomacy with niggers. The protest of poor old Crittenden rises up like a feeble drowning wail over the spot which marks a mile stone in history, the recognition of the equality of races by this Government.

HON. I. N. ARNOLD AND THE BANKRUPT LAW.

There seems to be an impression prevailing to a certain extent, that our representative in Congress, Hon. I. N. Arnold, voted in the House for the postponement of the Bankrupt Bill. We have taken the pains to obtain the facts in the case. In the House of Representatives, on the 4th of April, two votes were taken upon the bill:

The first was on the

"Motion submitted by Mr. Roscoe Conkling, and pending when the House adjourned on Monday last, to suspend the rule so as to enable him to move that the bill of the House (H. R. 337) to establish a uniform system of bankruptcy throughout the United States be made a special order immediately after the Pacific railroad bill is disposed of."

The yeas and nays were taken upon the question, and Mr. Arnold voted in the AFFIRMATIVE. But two-thirds not voting with Mr. Arnold, the motion was defeated.

"Mr. Washburne then moved that the further consideration of the said bill (H. R. 337) be postponed until the fourth Wednesday in December next."

The yeas and nays being called, Mr. Arnold voted in the NEGATIVE. But the motion to postpone was carried. Such is the record of Mr. Arnold on the Bankrupt Bill.

We may add that we *know* that Mr. Arnold is in favor of the passage of a judiciously drawn Bankrupt Bill, and those who assert the contrary are either mistaken or wilfully misrepresent him.

The $35,500 Subsidy to the National Intelligencer.

The following is the resolution and vote appropriating $35,500 as a subsidy to the *National Intelligencer*:

Resolved, That the Clerk of the House of Representatives be directed to procure from the publishers, for the use of the House library, at a cost not exceeding what has heretofore been paid for the said work, one hundred copies or sets of the Annals of Congress and Register of Debates, and to pay the same out of the contingent fund of the House: *Provided*, That the copies or sets remaining in the hands of the proprietors after the execution of this resolution shall not be sold or disposed of until they have been offered to Congress.

YEAS—Messrs. *Allen*, Baily, *Baxter*, Biddle, Jacob B. Blair, *Blake*, George R. Browne, William G. Brown, Calvert, Casey, Chamberlain, Cravens, Crisfield, *Cutler*, *Dawes*, *Delano*, *Duell*, Dunlap, *Edwards*, Eliot, Fenton, Gooch, *Goodwin*, Granger, Grider, Hall, Harding, Harrison, *Horton*, Johnson, Law, Leary, *McPherson*, Mallory, Maynard, Menzies, *Moorhead*, Noble, Nugent, Patterson, Perry, John S. Phelps, *Pomeroy*, Price, *Alexander H. Rice*, *Richardson*, *Riddle*, James S. Rollins, Segar, Sheffield, Shiel, John B. Steele, *Stevens*, Benjamin F. Thomas, Francis Thomas, *Train*, Vallandigham, Van Wyck, Verree, Wadsworth, Walton, Ward, Webster, Whaley, Albert S. White, Chilton A. White, Wickliffe, and Woodruff—86.

NAYS—Messrs. *Ancona*, *Baker*, *Beaman*, *Francis P. Blair*, *Brabham*, *Chamberlin*, *Clark*, Cobb, *Colfax*, *Comins*, *Conkling*, *Cox*, *Curtis*, *Darling*, *Davis*, *Diven*, *Edgerton*, *Edwards*, *Fessenden*, *Frank*, *Granger*, *Gurley*, *Hickman*, *Holman*, *Hutchins*, *Julian*, *Kelly*, *Kellogg*, *William Kelley*, *Kerr*, *Knapp*, *Lansing*, *Loomis*, *Lovejoy*, *McKnight*, *Wright Marshall*, *Samuel Marshall*, *Morrill*, *Nixon*, *Odell*, *Olin*, *Patton*, *Pike*, *Porter*, *Potter*, *John H. Rice*, *Robinson*, *Edward H. Rollins*, *Sargent*, *Shanks*, *Aaron Shaw*, *William Shaw*, *Shelabarger*, *Stratton*, *Trimble*, *Trowbridge*, *Van Horn*, *Van Valkenburgh*, *Verree*, *Wilson*, *Windom*, and *Worcester*—58.

RECAPITULATION.

Ayes—Republicans (in *italics*), 18; Democrats and Border States (in Roman), 68.

Noes—Republicans, 58; Democrats and Border States, 0.

Mr. Hickman stated in debate that plenty of these old sets could be bought at second hand, at less than half the *Intelligencer* price, if called by public advertisement; and it was not denied.

There are now 140 complete sets in the various libraries of the House and Senate, and this resolution provides for the purchase of 100 more. But the swindle does not end here. It provides that the *Intelligencer* firm shall not sell the remainder of the edition, without first offering them to Congress. Of course nobody but Congress would ever think of buying them. The governments of Europe have all been supplied with them by a former appropriation. There will still be 200 sets left, as the material for further fraud and corruption.

It will be noticed that Voorhees, of Indiana, who recently made an inflammatory speech about the pelican-breasts, voted for this miserable and criminal waste of the people's money.

From Cumberland Gap.

The Danville (Ky.) *Tribune* learns by returned visitors from Cumberland Gap, that the Federal troops at that point were got in motion on Thursday last, with their faces southward, eager for the expected meeting of the rebels, and fully determined to give them all that is necessary for a vindication of the cause which has engaged them.

Gen. Case Taken Ill.

On Monday last, Gen. Case, while in attendance on the funeral of the late Mrs. Campeau, at St. Anne's Church, Detroit, was taken suddenly and seriously ill, and conveyed to his home with many fears of his immediate decease. He was considerably better, however, on the following day.

☞ The Louisville *Journal* insists that Buckner's famous Order No. 28, which Beauregard said was to "fire the Southern army," did so—and it *end of!*

FROM HALLECK'S ARMY.

The Evacuation of Corinth.

FULL AND INTERESTING PARTICULARS.

The First Regiments Inside the Enemy's Entrenchments.

IMMENSE QUANTITIES OF PROVISIONS BURNED.

QUAKER GUN COMMUNICATIONS TO HALLECK.

What General Halleck Will Do.

[Special Correspondence of the Chicago Tribune.]

PITTSBURG LANDING, June 2, 1862.

Indisposition prevented my going out to Corinth on Friday, but I dispatched a trusty representative to that place, and from him have gathered as full particulars of the evacuation as I could have obtained myself, to which I add matters gleaned by myself in a ride to the front yesterday. I have also secured a valuable military map of the town and of the position of the advanced divisions of our army on Thursday, before our troops made the final forward movement. This map is authentic, having been prepared by the military engineers for Gen. Halleck's use. The locations of most of the buildings in Corinth are made from recollection, and, of course, not being properly a portion of the surveyed part of the map, may not be laid down exactly in the proper places. The map is, however, correct enough even in this respect for all practical purposes.

The positions of the various divisions of the army on Thursday morning were as designated on the map. On that day a further advance of about 1,000 yards was ordered, and made by Thursday evening. This brought our troops to within, probably, less than 1,000 yards, or within easy shelling distance of Corinth. And, indeed, so close were they that one of our shells fell upon or into a locomotive, killing the engineer, also killing and wounding several other persons in the vicinity, and tearing the engine to fragments. Another shell fell into a house, killing a woman who was in it, and setting fire to the building. The town was almost completely deserted by the people. A couple of old and plain looking women were all that were to be seen. There were not two inhabitants of the place met with in any portion of it. The population had doubtless vacated it through fear of the expected bombardment.

The location of the various divisions of the army on Tuesday morning, were as shown in the map. On Tuesday, at noon, a farther advance of a mile was ordered, and by the evening of that day the various divisions had reached the advanced lines as laid down in the map, or within 1,000 yards of the rebel entrenchments, where they began to put up their strong, trenching as before. As the advanced divisions went forward the reserves took up the positions which the former had located. Thus, had the enemy driven in our first line of entrenchments, the army could have fallen back upon the next, and even, were we defeated, there were two other lines as at Yorktown and stands could be made. During the advance every inch of the ground was disputed by the rebel pickets, which were out in force, and in the woods and ravines, and from behind the trees, fences, &c., in fact, from wherever a favorable spot could be found. Notwithstanding we lost but few men.

On Wednesday morning, nevertheless, Gen. Pope's corps met with large bodies of the enemy on the field, in front of Gen. Palme's division—which, by the bye, is a fighting division with a fighting general, having done more work of this character since the landing of the corps at Hamburg than any other in the entire army. The enemy evidently regard the repeated and vigorous attacks of Gen. Pope on their right with great dread them being but favor. Their right wing once turned, and their communication with the South by the Mobile and Ohio railroad would be cut off, which would include half their means of retreat. The most vigorous defense of the enemy was accordingly always made on their right. Here was the consequent formidable batteries. On their left they had merely rifle pits with abattis in front, while on the right were earth-works with traverses, embrasures, lunettes, &c., commanding all the approaches. Some of these works have a clean sweep of two miles and a half from three faces. There were also other and extensive earth works on elevated places. The whole formed a most formidable line of defense, extending from the left of the town to a point on the entrance north of the Charleston and Memphis railroad, say six or seven miles.

But nothing to my sketch of the two days' progress of the army preceding the evacuation of the place. The attack on Gen. Pope's corps on Wednesday, was so determined and made by such strong forces by ten o'clock that we lost three field pieces belonging to Hiscock's battery, and a Parrott gun belonging to another, some of which I could not obtain. The loss of these guns was occasioned by the giving way of their infantry supports. Our men, however, succeeded in spiking the pieces before abandoning them. It is stated that one of our infantry regiments was reprimanded by Gen. Pope for bad conduct in this affair, but for this I will not vouch, as I have not yet learned the fact officially, and for the same reason will not do perhaps an innocent regiment injury by circulating that which may be entirely without foundation. The brigade which bore the brunt of this action was that of Gen. Sweeny, and is composed of the 10th Illinois, commanded by the gallant Col. Morgan, one of the best regiments in the service, the 11th Missouri, the 16th Illinois, and one other regiment whose number I did not get. The Yates sharpshooters were in advance. Other regiments of the corps were subsequently brought up to support the brigade, and after a short but very spirited action the enemy were compelled to retire, leaving the captured guns, including the Parrott, in our hands. Finally, Gen. Pope fell back a short distance, and rested his forces for the night. The number of killed and wounded in this action on our part was about 100, divided about as follows, as nearly as I could obtain them, the various regiments changing positions so often, as they advanced, that it was almost impossible to get correct information.

	Killed.	Wounded.
11th Missouri	15	40
16th Illinois	6	19
10th Illinois	3	8
Total	25	69

The loss of the Yates sharp shooters was trifling, a few having been slightly wounded. This is a splendid body of men, and has done most excellent service here. They, as well as the Birge's sharpshooters, have been in the advance all the time, and did not hesitate, or get, and exposed to privation, toils, want of rest, &c., which are sufficient to daunt the courage, the ardor and try the patience, endurance and fortitude of the very best disciplined troops. Both of these regiments have already won an enviable fame for themselves and their country. The enemy must have lost a considerable number in this action, and the loss within the entrenchments on Wednesday night showed that he anticipated warm work in the morning.

Early on Thursday morning, the Yates sharpshooters were again thrown out as skirmishers. It was scarcely daylight, and they were actually compelled to grope their way through the woods and ravines, before approaching the earthworks of the enemy very cautiously, and at length climbing over them, they found them almost entirely deserted. A few sentinels were left behind them to give a few scattering shots, and then hastily retired. Lieut. Baker, of the Yates sharpshooters, with four men of his own, was the first to enter the earthworks lying adjacent to the Memphis and Charleston railroad track. In it he found a large ten of knapsacks, filled with excellent military clothing. In a short time several of the privates of the sharpshooters might be seen strutting about in mock dignity, decked up in rebel officer's uniforms. Shortly afterwards another redoubt, being the enemy's extreme right, was taken possession of, having also been abandoned.

Previously to these movements, however, the enemy commenced blowing up their magazines, fixed ammunition, military stores, &c., and also burning everything that remained in the place. It was between three and four o'clock on Thursday morning when our pickets and sharp-shooters from the right and left divisions of the army and the centre—Gen. W. T. Sherman's and Gen. Pope's—first entered the place. They immediately dispatched back couriers to their respective divisions to inform them of the fact. Of course the word was received with rejoicing and observed with alacrity, each division being desirous of having the honor of planting the first Federal flag within the enemy's works. Gen. Pope's corps entered by the lower or Farmington road, Gen. Nelson's by the main or Corinth road, and Gen. W. T. Sherman's by the upper or Purdy road. All these roads at an early hour on Friday morning were crowded with our troops, pushing forward, followed by their baggage. So much was this the case that many brigades, although eager to get up and thus take a part in what was expected would be a general engagement, could not do so on account of being impeded by the baggage trains which blocked up the roads through the woods in every direction.

Gen. Pope's corps elevated the Federal flag on the court house, the 20th Ohio claiming the honor, and Gen. Sherman's division did the same on the ladies' college or seminary, to the west of the place. Gen. Nelson's division, how ever, claims the honor of having been first in the place, and the 37th Kentucky of having planted the first Federal flag within the works, on the brow of a hill immediately behind the rebel batteries. Major Noyes of Cincinnati, of the 24th Ohio regiment, claims the credit of having planted the Federal flag upon the "young ladies' seminary;" but the honor of the achievement is also disputed for Hon. David Stuart of your city, the gallant Colonel of the fighting Illinois 56th. And my opinion is that Colonel Davis's claim on that score is the better of the two, for doubtless he was "in that" when the deed was consummated.

☞ Be satisfied in love, and so valiant in war.

The home of Beauregard is confiscated to the use of Gen. Sherman with his usual impetuosity pushed his force to the west of the place in close pursuit of the enemy, but coming upon an extensive swamp which had been obliged, he found the latter burned, and thus all pursuit in that quarter effectually cut off.

About two o'clock in the afternoon Gen. Halleck made his *entry* accompanied by his staff and body guard. He rode through the place and passing the headquarters of Beauregard, a brick Building in the French style, reined up his horse for a moment for the purpose of taking a good look at it. He rode around the town, but did not dismount, if I except one instance. In passing out at the northern side of the place his horse tripped up on a telegraph wire which was lying across the road, and nearly threw its rider. The General immediately dismounted, and extended the elevation of the wire to its proper position and then passed on.

It appears that in evacuating the place on Thursday night, the rebel main body passed out by the railroads, leaving 40,000 men as a rear guard. The division of this corps that evacuated the place in a southeasterly direction was commanded by Van Dorn, and it is said Gen (Bishop) Polk commanded the last division that left in a westerly direction. These facts were obtained from two sons of an old lady, a resident of Corinth, by Gen. Nelson. This lady proved to be the grand-niece of Alexander Hamilton. The sons were fine looking and intelligent young men, and spoke freely to our officers of the rebel army, its officers, and its movements. The old lady frankly admitted that she was a secessionist; that her sympathies were entirely with the South in this struggle; that she thought it was now all up to a point—hence, and hoped it would achieve it, but was afraid it would not. She also stated that Gen. Beauregard had been extremely kind and attentive to her, and had constantly sent her supplies while he remained in the place.

The 22d Ohio was the first regiment of Buell's corps which entered the place. Among the first regiments to enter with Sherman's division was the celebrated 8th Missouri, one of the best fighting regiments in our army.

Nothing of value in a military point of view was found in the place, notwithstanding that the freight depot had not actually been blown up until after the troops had entered it. Every thing had been carefully removed, apparently days beforehand. On Thursday night the enemy continenced their final evacuation, and in that and the next twenty trains of cars filled with troops left the town within the previous twenty-four hours.

To the right of the road by which Nelson's division entered was a large wooden gun, mounted on an earthwork, the muzzle peeping out of an embrasure. Upon it the following inscription, on a piece of white paper, was tacked:

"Old Halleck take care or you will get your brains blown out!"

On a sign board on the road by which Pope's division entered was nailed a piece of paper, on which the following was written:

"We whipped you like h—l on Sunday, 6th of April; you thrashed us like the d—l on Monday, the 7th; and for fear you will thrash us like damnation to-day, we bid you goodbye."

Four wooden or Quaker guns were found in the works.

The troops entered between seven and eight o'clock, and those that entered on the right found that the plates and dishes had not been removed from the breakfast table, in the ladies seminary. The appearance of the table indicated that the meal had been a hasty one. Nothing left, nor was there turned to and finished what the rebels had left.

I stated in a former letter that it was said the rebels were short of provisions, and that the water was bad. These do not appear to have been the facts. Immense quantities of flour in barrels had been piled up in heaps and burned; also large quantities of beef and bacon, the latter an article which it was stated the rebels did not possess. As to water, that was found of good quality, and in large quantity. Several gentlemen inform us that they partook of that in the well at the depot and found it to be the most excellent they ever drank. Yet I was informed otherwise by several professed Union men who had fled from Corinth and obtained protection and employment within our lines. There is but one small creek and that is in front of the rebel lines in the immediate neighborhood of Corinth, where they were in the habit of thirsting, trenching as before. As the advanced divisions went forward the reserves took up the positions which the former had located. Thus, had the enemy driven in our first line of entrenchments, the army could have fallen back upon the next, and even, were we defeated, there were two other lines as at Yorktown and stands could be made. During the advance every inch of the ground was disputed by the rebel pickets, which were out in force, and in the woods and ravines, and from behind the trees, fences, &c., in fact, from wherever a favorable spot could be found. Notwithstanding we lost but few men.

On Wednesday morning, nevertheless, Gen. Pope's corps met with large bodies of the enemy on the field, in front of Gen. Palme's division—which, by the bye, is a fighting division with a fighting general, having done more work of this character since the landing of the corps at Hamburg than any other in the entire army. The enemy evidently regard the repeated and vigorous attacks of Gen. Pope on their right with great dread them being but favor. Their right wing once turned, and their communication with the South by the Mobile and Ohio railroad would be cut off, which would include half their means of retreat. The most vigorous defense of the enemy was accordingly always made on their right. Here was the consequent formidable batteries. On their left they had merely rifle pits with abattis in front, while on the right were earth-works with traverses, embrasures, lunettes, &c., commanding all the approaches. Some of these works have a clean sweep of two miles and a half from three faces. There were also other and extensive earth works on elevated places. The whole formed a most formidable line of defense, extending from the left of the town to a point on the entrance north of the Charleston and Memphis railroad, say six or seven miles.

But nothing to my sketch of the two days' progress of the army preceding the evacuation of the place. The attack on Gen. Pope's corps on Wednesday, was so determined and made by such strong forces by ten o'clock that we lost three field pieces belonging to Hiscock's battery, and a Parrott gun belonging to another, some of which I could not obtain. The loss of these guns was occasioned by the giving way of their infantry supports. Our men, however, succeeded in spiking the pieces before abandoning them. It is stated that one of our infantry regiments was reprimanded by Gen. Pope for bad conduct in this affair, but for this I will not vouch, as I have not yet learned the fact officially, and for the same reason will not do perhaps an innocent regiment injury by circulating that which may be entirely without foundation. The brigade which bore the brunt of this action was that of Gen. Sweeny, and is composed of the 10th Illinois, commanded by the gallant Col. Morgan, one of the best regiments in the service, the 11th Missouri, the 16th Illinois, and one other regiment whose number I did not get. The Yates sharpshooters were in advance. Other regiments of the corps were subsequently brought up to support the brigade, and after a short but very spirited action the enemy were compelled to retire, leaving the captured guns, including the Parrott, in our hands. Finally, Gen. Pope fell back a short distance, and rested his forces for the night. The number of killed and wounded in this action on our part was about 100, divided about as follows, as nearly as I could obtain them, the various regiments changing positions so often, as they advanced, that it was almost impossible to get correct information.

	Killed.	Wounded.
11th Missouri	15	40
16th Illinois	6	19
10th Illinois	3	8
Total	25	69

The loss of the Yates sharp shooters was trifling, a few having been slightly wounded. This is a splendid body of men, and has done most excellent service here. They, as well as the Birge's sharpshooters, have been in the advance all the time, and did not hesitate, or get, and exposed to privation, toils, want of rest, &c., which are sufficient to daunt the courage, the ardor and try the patience, endurance and fortitude of the very best disciplined troops. Both of these regiments have already won an enviable fame for themselves and their country. The enemy must have lost a considerable number in this action, and the loss within the entrenchments on Wednesday night showed that he anticipated warm work in the morning.

Early on Thursday morning, the Yates sharpshooters were again thrown out as skirmishers. It was scarcely daylight, and they were actually compelled to grope their way through the woods and ravines, before approaching the earthworks of the enemy very cautiously, and at length climbing over them, they found them almost entirely deserted. A few sentinels were left behind them to give a few scattering shots, and then hastily retired. Lieut. Baker, of the Yates sharpshooters, with four men of his own, was the first to enter the earthworks lying adjacent to the Memphis and Charleston railroad track. In it he found a large ten of knapsacks, filled with excellent military clothing. In a short time several of the privates of the sharpshooters might be seen strutting about in mock dignity, decked up in rebel officer's uniforms. Shortly afterwards another redoubt, being the enemy's extreme right, was taken possession of, having also been abandoned.

Previously to these movements, however, the enemy commenced blowing up their magazines, fixed ammunition, military stores, &c., and also burning everything that remained in the place. It was between three and four o'clock on Thursday morning when our pickets and sharp-shooters from the right and left divisions of the army and the centre—Gen. W. T. Sherman's and Gen. Pope's—first entered the place. They immediately dispatched back couriers to their respective divisions to inform them of the fact. Of course the word was received with rejoicing and observed with alacrity, each division being desirous of having the honor of planting the first Federal flag within the enemy's works. Gen. Pope's corps entered by the lower or Farmington road, Gen. Nelson's by the main or Corinth road, and Gen. W. T. Sherman's by the upper or Purdy road. All these roads at an early hour on Friday morning were crowded with our troops, pushing forward, followed by their baggage. So much was this the case that many brigades, although eager to get up and thus take a part in what was expected would be a general engagement, could not do so on account of being impeded by the baggage trains which blocked up the roads through the woods in every direction.

Gen. Pope's corps elevated the Federal flag on the court house, the 20th Ohio claiming the honor, and Gen. Sherman's division did the same on the ladies' college or seminary, to the west of the place. Gen. Nelson's division, how ever, claims the honor of having been first in the place, and the 37th Kentucky of having planted the first Federal flag within the works, on the brow of a hill immediately behind the rebel batteries. Major Noyes of Cincinnati, of the 24th Ohio regiment, claims the credit of having planted the Federal flag upon the "young ladies' seminary;" but the honor of the achievement is also disputed for Hon. David Stuart of your city, the gallant Colonel of the fighting Illinois 56th. And my opinion is that Colonel Davis's claim on that score is the better of the two, for doubtless he was "in that" when the deed was consummated.

☞ Be satisfied in love, and so valiant in war.

The home of Beauregard is confiscated to the use of Gen. Sherman with his usual impetuosity pushed his force to the west of the place in close pursuit of the enemy, but coming upon an extensive swamp which had been obliged, he found the latter burned, and thus all pursuit in that quarter effectually cut off.

About two o'clock in the afternoon Gen. Halleck made his *entry* accompanied by his staff and body guard. He rode through the place and passing the headquarters of Beauregard, a brick Building in the French style, reined up his horse for a moment for the purpose of taking a good look at it. He rode around the town, but did not dismount, if I except one instance. In passing out at the northern side of the place his horse tripped up on a telegraph wire which was lying across the road, and nearly threw its rider. The General immediately dismounted, and extended the elevation of the wire to its proper position and then passed on.

It appears that in evacuating the place on Thursday night, the rebel main body passed out by the railroads, leaving 40,000 men as a rear guard. The division of this corps that evacuated the place in a southeasterly direction was commanded by Van Dorn, and it is said Gen (Bishop) Polk commanded the last division that left in a westerly direction. These facts were obtained from two sons of an old lady, a resident of Corinth, by Gen. Nelson. This lady proved to be the grand-niece of Alexander Hamilton. The sons were fine looking and intelligent young men, and spoke freely to our officers of the rebel army, its officers, and its movements. The old lady frankly admitted that she was a secessionist; that her sympathies were entirely with the South in this struggle; that she thought it was now all up to a point—hence, and hoped it would achieve it, but was afraid it would not. She also stated that Gen. Beauregard had been extremely kind and attentive to her, and had constantly sent her supplies while he remained in the place.

The 22d Ohio was the first regiment of Buell's corps which entered the place. Among the first regiments to enter with Sherman's division was the celebrated 8th Missouri, one of the best fighting regiments in our army.

Nothing of value in a military point of view was found in the place, notwithstanding that the freight depot had not actually been blown up until after the troops had entered it. Every thing had been carefully removed, apparently days beforehand. On Thursday night the enemy continenced their final evacuation, and in that and the next twenty trains of cars filled with troops left the town within the previous twenty-four hours.

To the right of the road by which Nelson's division entered was a large wooden gun, mounted on an earthwork, the muzzle peeping out of an embrasure. Upon it the following inscription, on a piece of white paper, was tacked:

"Old Halleck take care or you will get your brains blown out!"

On a sign board on the road by which Pope's division entered was nailed a piece of paper, on which the following was written:

"We whipped you like h—l on Sunday, 6th of April; you thrashed us like the d—l on Monday, the 7th; and for fear you will thrash us like damnation to-day, we bid you goodbye."

Four wooden or Quaker guns were found in the works.

The troops entered between seven and eight o'clock, and those that entered on the right found that the plates and dishes had not been removed from the breakfast table, in the ladies seminary. The appearance of the table indicated that the meal had been a hasty one. Nothing left, nor was there turned to and finished what the rebels had left.

I stated in a former letter that it was said the rebels were short of provisions, and that the water was bad. These do not appear to have been the facts. Immense quantities of flour in barrels had been piled up in heaps and burned; also large quantities of beef and bacon, the latter an article which it was stated the rebels did not possess. As to water, that was found of good quality, and in large quantity. Several gentlemen inform us that they partook of that in the well at the depot and found it to be the most excellent they ever drank. Yet I was informed otherwise by several professed Union men who had fled from Corinth and obtained protection and employment within our lines. There is but one small creek and that is in front of the rebel lines in the immediate neighborhood of Corinth, where they were in the habit of thirsting, trenching as before. As the advanced divisions went forward the reserves took up the positions which the former had located. Thus, had the enemy driven in our first line of entrenchments, the army could have fallen back upon the next, and even, were we defeated, there were two other lines as at Yorktown and stands could be made. During the advance every inch of the ground was disputed by the rebel pickets, which were out in force, and in the woods and ravines, and from behind the trees, fences, &c., in fact, from wherever a favorable spot could be found. Notwithstanding we lost but few men.

On Wednesday morning, nevertheless, Gen. Pope's corps met with large bodies of the enemy on the field, in front of Gen. Palme's division—which, by the bye, is a fighting division with a fighting general, having done more work of this character since the landing of the corps at Hamburg than any other in the entire army. The enemy evidently regard the repeated and vigorous attacks of Gen. Pope on their right with great dread them being but favor. Their right wing once turned, and their communication with the South by the Mobile and Ohio railroad would be cut off, which would include half their means of retreat. The most vigorous defense of the enemy was accordingly always made on their right. Here was the consequent formidable batteries. On their left they had merely rifle pits with abattis in front, while on the right were earth-works with traverses, embrasures, lunettes, &c., commanding all the approaches. Some of these works have a clean sweep of two miles and a half from three faces. There were also other and extensive earth works on elevated places. The whole formed a most formidable line of defense, extending from the left of the town to a point on the entrance north of the Charleston and Memphis railroad, say six or seven miles.

The Tribune.

FRIDAY, JUNE 6, 1862.

THE CITY.

APPOINTMENT.—Comptroller Hayes has appointed Mr. Francis M. Barrett as second clerk in his office.

☞ We would call attention to the card of Messrs. W. B. Hibbard & Co., Commission Merchants.

☞ We would call the attention of citizens generally, and particularly those of the North Division, to the new boot and shoe store of Wiswall & Day, 96 North Clark street, whose card appears in to-day's advertisements.

IDENTIFIED.—The body found at Madison street bridge yesterday has been identified as that of John Kolz, a Hollander, who formerly resided near Clybourne avenue, on the North Side. He was in the employ of a milkman named Fisk, who paid him five dollars on Friday last, since which he has not been seen alive. He leaves a wife and two children.

CO. A 12TH ILL. CAVALRY.—This Company, Capt. T. W. Grosvenor, wants a few more men. Any one desiring to enter this arm of the service will not find a better opportunity. The regiment is composed of experienced officers and good men, and is in readiness to march. Application can be made to Lieut. Luff, 120 Klazie street.

☞ Lieut. Levi W. Hart of Bartlett's battery, will leave Chicago for Corinth on Monday morning. Any person wishing to send letters or small packages to friends in the company can do so by leaving them before six o'clock p. m. Saturday, at Peake, Marsh & De Leng's, 37 Lake street.

RECRUITS WANTED.—Capt. Miller's company of artillery now at Camp Douglas is under marching orders, and will probably leave for the seat of war as soon as their cannon arrive. A few more recruits are wanted. Apply to Capt. Miller in person, at Camp Douglas, or at 100 Klazie street.

NEW COMMISSION HOUSE.—We desire to call attention to the new commission house of Wm. Little & Co., No. 281 South Water street. Mr. Little, late of Wm. Little & Co., wholesale grocers, and Mr. Sackett, late of Sackett & Co., for several years past in the commission business, are too well known to need any comments from us. Those consigning produce of any kind, or having grain and flour for sale, will find in these gentlemen all they could desire as consignees. They refer to several of our oldest business houses, and we cheerfully endorse them.

ESCAPED FROM THE LUPATIC ASYLUM.—A man by the name of Daniel Smalley made his escape from the Lunatic Asylum at Jacksonville, on the 24th of March, since which nothing has been heard of him. He is five feet ten inches high, slender built, thin face and no whiskers. His insanity is principally upon religious subjects; talks much of doing the will of God, and professes to have direct communications from Him in reference to the particular way he should act, dress, &c. Any information in reference to him will be thankfully received by his afflicted wife, residing in LaGrange, Ill., or A. D. Tittsworth, 113 Lake street, Chicago.

THE EGYPTIAN SWINDLE.—MEETING AT WARNER'S HALL.—A second meeting of those opposed to the new Constitution was held at Warner's Hall last evening, Charles Walker, Esq., in the chair, J. Summerfield acting as Secretary. Although the meeting was impromptu and only preliminary to a mass meeting to be held Saturday night, great enthusiasm prevailed. Stirring speeches were made by Gen. U. F. Linder, Charles Walker, Esq., Peter Page, Esq., and others, and a committee chosen, consisting of Peter Page, Lewis H. Davis, and Daniel Brainard, Jr., to make arrangements for the coming meeting of which we shall give further intelligence in our next issue. The most cheering news is coming in from all quarters, of opposition to the Egyptian swindle and a determination to crush it out. For once the people are aroused and determined that designing politicians shall not crush this iniquitous fraud down their throats. The skies are bright and all omens propitious.

OUR "COMMERCIAL" GETS A PRESENT.—On Wednesday evening some unknown person placed a basket containing a male child about four weeks of age, upon the doorstep of the residence of J. F. Ballantyne, Commercial Editor of the paper. In the basket containing the little waif, the cruel kindness of its unknown parent, had placed a bottle of milk, and a change of clothing. To the cruelty of desertion the same parent had added the danger of destroying the little one, by drugging it to keep it quiet. Mr. B. took the little stranger thus rudely thrust upon the world into his charge, and had it sent to the Home for the Friendless, where it will find proper care and attention. The family were absent at the time the basket was left, but the neighbors observed the action, taking little notice of it, supposing they supposed it was a consignment of goods. The party who left it was a tall, heavy, black-whiskered man. Late in the night a woman clad in a white shawl was observed hovering about the premises, but suddenly becoming alarmed, she rapidly disappeared.

TRIAL TRIP OF THE TUG J. PRINDIVILLE.—The new and staunch wrecking tug, J. Prindiville, with a large party of invited guests on board, left her dock yesterday afternoon at four o'clock upon her first trial trip, which proved eminently successful, and demonstrated beyond question that Chicago mechanics have turned out the handsomest tug upon the lakes. Every part of the Prindiville except her boilers is the handiwork of our own mechanics. While upon the lake, a basket of Sillery was opened, and appropriate addresses were made by Ex-Mayor Ramsey, B. F. Ayer, Esq., and others, and a general season of good wishes and good feeling prevailed.

The engines of the Prindiville are twenty-four-inch beam, twenty-two inch stroke, and of five hundred horse power. She cost in the vicinity of $30,000. She was built by Miller Bros. & Clarke, and her engines by Henry Warrington. Joseph Nicholson, Esq., formerly commander of the Planet, is captain, and John Ebart, lately connected with the Galena road, is engineer. Both of these men are well known citizens, and men who must prove popular in any undertaking. The Prindiville will be used mainly upon the St. Clair Flats; and for working purposes she is in every respect the largest, handsomest and most powerful tug upon the lakes. We congratulate her owners, Messrs. Prindiville, upon the success of their new tug, creditable alike to the builders and the wide-awake energy and business enterprise of her owners. Success to the gallant craft.

OPENING OF SHUFELDT'S ALCOHOL WORKS.—The extensive alcohol manufactory of Mr. H. E. Sandelds, No. 69 South Water street, was opened for public inspection on Tuesday afternoon, and was made the occasion of a visit by a large number of South Water street merchants, who spent a pleasant hour in inspecting the establishment and apparatus, and discussing a handsome banquet, set by the enterprising proprietor. This house were the first manufacturers of alcohol and pure spirits in Chicago, commencing in 1855, at which time they turned out some twenty-five barrels per day. Then the market was principally supplied from Cincinnati and other places. Now the capacity of the new apparatus is about eighty barrels per day, and it can be increased very easily to about 100 barrels per day. The building occupied by Mr. Shufeldt is 20 by 140 feet, and six stories high. In the basement are the steam boilers; on the first floor the kettle—which is of copper, and holds forty barrels—surmounted by a dome of burnished copper, with finished brass facings. The column, also of copper, is in seven sections, thirty-six inches in diameter, and twenty-four feet in height, extending to the third story. Its cost was $3,000, the whole cost of the apparatus being $10,000. In the second story are the thumping box, the alcohol and spirit receiving, changing and distilling tubs, &c. In the third story is the cold worm, 200 feet in length, and eight rectifiers; also a packed tub for rectifying the lake water for use in the boilers. Here, too, is an excellent fire apparatus, which may be of incalculable use in time of need. In the fourth story is the condensing worm, which will hold 900 barrels of water, and has a faucet weighing fifty pounds, costing $25. There are also on this floor numerous tubs for mixing spirits to rectify, &c. In the fifth story is the water-feeder, with a capacity of 225 barrels.

The magnitude of the establishment is on a par with the enterprise of the proprietor, and will undoubtedly yield to him a splendid return upon his investment. We commend him to the patronage of business men everywhere.

THE STATE SABBATH SCHOOL CONVENTION.

Last Day's Proceedings.

☞ We give place in this issue to the following address by Mr. C. B. Fisk, of St. Louis, delivered on Wednesday evening, which should have appeared in our issue of yesterday, but was unavoidably omitted. The lateness of its appearance, however, will not detract at all from its excellence:

Mr. Fisk in coming before his Chicago friends did not expect to be interested with such a speech-raising speech, although he was proud to be one of the five who had been the instruments in God's hands in the establishment of a Christian Church in the city of St. Louis upon the broad basis of loyalty to God and the country. It had been a pleasure to him to turn away a day or two from the surging elements of St. Louis and meet with his co-laborers in the blessed Sunday school cause, from Illinois, Wisconsin and Minnesota. He was glad to be a visitor in the Sunday School army. The Sabbath School was the pacemaker, Monitor on the sea of Christian civilization. It was the right arm of the Christian Church. It was the sunshine of the Spirit. Sunday School work required sympathy and the support of all who would push on the car of God's covenant of mercy to fallen man. He felt grateful, that he was permitted to be a laborer in this fruitful vineyard of the Lord. He believed that from the ranks of our Sunday School would come our most valuable men for all the positions of life—from the best merchant, mechanic, miller, lawyer, banker, politician, statesman, minister of the gospel, would come from among those who had been early educated in this nursery of the Christian Church. After a brief review of the progress which had been already accomplished through this instrumentality, and exhorting the Christian men and women before him to be faithful in their efforts and labor with a new earnestness in their work for God and humanity, he closed his address and took his seat amid the hearty applause of the audience.

Mr. Fisk is designed to furnish to the child a proper religious education, and destiny is introduced that will not lead the child to Christ. He called upon all his co-laborers the benediction of Christ, when their work here was done, might they all be called to an eternal life in heaven.

Resolutions were then passed, tendering thanks to the citizens of Chicago, who had so kindly opened their homes and hearts to entertain us;" to the trustees and officers of the Chicago Union Railroad Company, from May 22d to 31st:

The FARMERS AND THE CURRENCY.—We are glad to publish the following resolutions as embodying the right kind of talk from the right place. If the people demand a Treasury Note issue of sufficient amount to relieve the money market, should be earnestly pressed upon the attention of Congress, till they pass stringent laws to give the people a currency in which they can have confidence, but bank-note shinplasters:

The following are the resolutions:

At a mass meeting of the farmers and others, held at Tonica, La Salle county, Illinois, May 30, 1862, the following resolutions were unanimously adopted:

Resolved, That we recommend to Congress the passage of a law authorizing the issue of Treasury Notes, such as legal tenders in all ordinary transactions, receivable for all Government dues, in denominations of one dollar and upwards, convertible into Government bonds, bearing three per cent. interest per annum, and such amount as may be necessary to meet the demands of the public currency, or to the extent of the entire paper currency necessary to meet the wants of the business interests of the country.

Resolved, That after the 15th day of June next, we will refuse all paper currency, except Treasury Notes, Gold and Silver, Treasury Notes of the Bank of the State of Indiana, the State Bank of Ohio, the State Bank of Iowa, and the issues of such Banks as good standing, that as soon as the Government issues of Treasury Notes are sufficient to meet the wants of the business interests, we will refuse all other paper currency.

Resolved, That we recommend to Congress the passage of a law authorizing the issue certificates of deposit or paper of any kind used as a circulating medium, not less than three per cent per annum.

Resolved, That we invite the co-operation of all the citizens of the State who did not make money out of the attempted operation.

Resolved, That the secretary furnish a copy of the foregoing resolutions to each of the city papers, and to all the papers in this county, with the request that they publish the same, and invite all the papers in the State, generally to do so in the interests to copy; also, that he furnish a copy to each of the representatives and senators in Congress.

M. B. LOCKWOOD, President.
C. COPELAND, Jr., Secretary.

ELECTION OF DIRECTORS OF THE OHIO AND MISSISSIPPI RAILROAD.—Yesterday afternoon, the stockholders of the Ohio and Mississippi Railroad held their annual meeting and elected the following Directors: Alonzo Foster, N. Y.; Henry Ady Anderson, Cincinnati; Wm. H. Aspinwall, N. Y.; Edwin Bartlett, do.; Wm. M. Dickson, Cincinnati; Henry Clews, N. Y.; Charles D. Cobb, Cincinnati; Charles S. Cox, do; Samuel W. Comstock, N. Y.; Edward Delafield, N. Y.; Wm. Edgar, do; Edward Leonard, N. Y.; Wm. J. McAlpin, Cincinnati; Thomas J. Oakley, do; S. S. Page, N. Y.; John New York; S. W. Pomroy, Cincinnati; W. W. Scarborough, do; Fred. Schroeder, N. Y.; Wm. Tecumseh Sherman, Cincinnati, and William Whitewright, jr., N. Y. Mr. Odell was elected at the request of the Cincinnati bondholders. The election of officers will take place to-day. The Secretary and Treasurer's report will be ready for a few days, when they will be given to the public through the press.

		Stoves no	77

The receipts of produce to day were liberal—embracing 9,000 bbls flour, 84,539 bushels wheat, 151,729 bu corn, and 40,473 bu oats. There was a good attendance on 'Change, but business was generally dull.

The Wheat market suffered a decline of 1@2c ₩ bushel—there being but a very limited shipping and little or no speculative inquiry. Corn in Spring was particularly dull, and the sales of this grade were trifling. No. 2 Spring and Amber Iowa were in fair request, but at lower prices than holders were willing to sell at. Only about 25,000 bushels of all grades changed hands, at 31c for No 2 Red Winter; 36@36½c for Amber Iowa; 28@29c for No 1 Spring; 27½@28c for No 2 Spring; and 25@26c for winter receipts do. Receipts of No 2 Spring at Munn & Scott's elevators were in active request, and 20,000 bushels changed hands, at 28½c—while in other houses the range was 27@27½c. At the close the market for wheat was exceedingly dull and the tendency was downwards.

The Flour market still maintains its usual features—there being no apparent life in it. Only a few small lots were sold at $3.90@4.60 for good to very choice brands of Spring Extras.

Corn was in good request and steady at yesterday's prices—a slight advance being paid in some instances for round lots. About 190,000 bushels changed hands, chiefly for Old Mixed at 29½c per afloat; 29½@30c for Old Mixed afloat; 29½@30½c for New River Yellow afloat; 27c for New River Mixed afloat; 27½@28½c for Old Mixed in store; 24½@25c for New Mixed in store; 23¾@24c for Old Yellow in store; and 24½@25c for Rejected in store. New Mixed Corn was scarce, and prices ruled a shade higher, as will be seen from the quotations. The market at the close was firm—Old Mixed in store selling at 28c.

Oats were in good demand, and an advance of ½c per bushel was paid for round lots—with sales of about 30,000 bushels at 83½@36c in store. Rye declined 1c—sales being made at 38@39c. Barley was sold at a range of 83@85½c. Choice samples are scarce and wanted. Highwines were active and steady, with sales of 23½ bbls at 20½@21c. Provisions dull. Tallow firm.

Freights opened firmer, but fell back again and closed quiet. Nine vessels were engaged at 4½ c for corn, 5½c for wheat, and 5½c for rye to Buffalo—the latter to load at four warehouses.

The Inspection of Grain.

As the question of abolishing the system of grain inspection to be considered at the meeting to be held on Saturday evening, at the Board of Trade Rooms, is of vital importance to every grain dealer in the city and country, every member of the Board, whether resident here or elsewhere, ought to be present. The subject deserves mature deliberation, and the welfare of the whole city, but of the entire Northwest are involved—and we trust every member will be found in his place on Saturday evening to counsel and vote as he deems right and proper.

Imports of Wheat and Flour into Great Britain.

The following statement shows the importations of wheat and flour into the United Kingdom for the three months ending March 31st, 1863, as compared with the same period in 1861:

WHEAT.	1861. Qrs.	1862. Qrs.
From Russia	267,970	137,332
" Prussia, Dantzick, &c	265,797	210,096
" France	169,400	90,000
" Egypt, Turkey and Danube	253,350	214,220
" United States	626,332	726,551
" Other countries	277,098	140,993
Total Wheat, qrs	1,859,491	1,619,209
FLOUR.	Cwt.	Cwt.
From Hanse Towns and France	414,439	97,048
" United States	1,404,168	1,620,053
" Other Countries	256,870	250,775
Total Flour, cwt	2,157,497	1,918,966

European Grain Markets—The Crops.

Throughout all Europe there has been a break down in the grain markets, caused principally by the favorable appearance of the growing crops in France the accounts continue to be satisfactory from all the departments, and in some the prospect is for beyond the average for years. The forward state of the crops is almost unprecedented, and the harvest promises to be one of the earliest on record. This has caused an extreme depression on the grain markets there, and a decline of 1s 6d sterling per quarter on wheat. Flour and Indian corn have also declined 1s per quarter, and Hamburgh was fully 1s per quarter. In Italy the weather was very fine, and the tendency was downward for all grain.

The *New York Long Express* of the 28th ult. writes: It does not repeat very frequently that the markets of Europe, either universally, reports a decline in the London market of 10@2s per quarter in wheat, and that the "anticipated pressure of taxes on the royal subjects of the Federal government brings out the unwonted news that descendant strong in the "lake ports willsettable shippers to send on greater quantities than were last season supplied to Europe." This, however, much depends on the crops, which are now two or three weeks later than usual.

CHICAGO DAILY MARKET.

☞ *Grain sold "to store" is subject to the storage, which is paid by the buyer, exclusive of the price paid for the grain to the seller. Grain sold "afloat" is delivered "free of charges," or "f. o. b."*

THURSDAY EVENING, June 5, 1862.

FREIGHTS—Firmer. The engagements were as follows:—To Buffalo:—Schr. Rebecca, 77m, (to load at four warehouses), at 4½c; schrs. Live Oak and Ocean Wave, corn; at 5c; schr. Kate Richmond, wheat, at 5½c; schrs. B. Parsons, Empire State, and Cairo, and brig Montezuma, corn, at 4½c; Schr. Mary M. Scott, oats at 4c.

FLOUR—Received, 9,629 bris; shipped, 12,369 bris. Market at till dull. Sales. 100 bris "Rockey Ex." choice spring at $4.40 on track; 100 bris "Lillian" choice r. h. Spring extra at $4.40; 100 bris "Atlantic" r. h. (Princeton) at $3 50; 250 bris "Harmony" on p. t.; 200 bris good Spring extra at $4 50; 100 bris "Ceresco" Spring extra at $4.60; 300 bris White superfine at $4.30; 100 bris Spring superfine at $3.50; 13 bris Rye Flour at $3 62½.

WHEAT—Received, 84,538 bu; shipped, 104,675 bu. Market dull and 1@2c lower. Sales 400 bu No. 3 Red Winter in store at 31c; 4,000 bu Amber Iowa in store at 31c; 2,700 bu do at 30½c; 3,300 bu do at 30c; 9,400 bu No. 1 Spring in store at 29c; 2,800 bu do at 28½c; 2,500 bu do at 28c; 4,000 bu No. 2 Spring in store at 28c; 2,000 bu do at 27½c; 1,500 bu do at 27c; 3,000 bu do (in Munn & Scott's at 28c; 600 bu do at 26½c; 1,000 bu Rejected Spring No. 2 Spring at 26c; 400 bu do at 25c; 400 bu Rejected Spring in store at 25c; 800 bu do at 26c; 1,800 bu do at 25c.

By sample, 43 bags White Winter at 31c on track; 130 bags Red Winter at 30c on track; 90 bags Spring at 29c; 310 bags Red Winter, at 25c on track.

CORN—Received, 151,729 bu; shipped, 87,400 bu. Market active and steady. Sales were:—9,000 bu Old River White at 31c afloat; 15,000 bu do at 31½c afloat; 10,000 bu Old River Mixed at 30 to 30½c; 5,000 bu do at 29½c afloat; 2,000 bu choice New Yellow (inspected New Mixed) at 30c f. o. b.; 2,000 bu do at 29½c afloat; 10,000 bu do at 29c afloat; 11,000 bu New Mixed at 27c afloat; 500 bu Old Yellow in store at 28½c; 400 bu do at 28½c; 20,000 bu Old Mixed in store at 28½c—on round lot; 45,000 bu do at 28c; 5,000 bu do at 27½c; 2,000 bu do at 27½c; 58,000 bu do at 27½c; 20,000 bu do (mostly in North Side warehouses) at 27¾c; 1,800 bu New Mixed in store at 24½c; 2,500 bu do at 24½c; 4,000 bu do at 25c; 1,000 bu Rejected in store at 23c; 7,000 bu do at 24½c.

OATS—Received 40,479 bu; shipped, 8,175 bu. Market advanced 1c. Sales, 14,000 bu No. 1 in store at 29c; 7,000 bu do at 28½c; 6,000 bu do at 28¾c.

RYE—Received, 4,437 bu. Market dull and 1c lower. Sales, 1,800 bu No 1 in store at 39c; 1,200 bu do at 38c; 75 bags at 39c on track.

BARLEY—Received, 79 bu. Market steady, and firm for good samples. Which are scarce. Sales, 65 bags choice at 82½c on track; 84 bu good at 83c on track; 200 bags medium at 44c del.; 32 bags common at 39c del.

Corn meal in fair request and steady at $2 70@4. Corn meal in fair request; sales of 1,200 bris at $2.75 for Brandy cinnamon; $3.25 for Golden Sheaf; $3.50 for Golden Sheaf, and $3.75 for Golden Sheaf.

GRASS SEED—Timothy in good demand and firmer; sales of 1,500 bushels at $1.75@1.80. Clover in fair request and steady; sales of 1,000 bushels at $4.25@4.50.

GRAIN—Wheat a shade firmer; sales of 10,000 bushels for export. Corn in better demand; sales of 10,000 bushels for export. Oats in fair request; sales of 10,000 bushels at 29½@30c. Barley in fair request; sales of 1,500 bushels at $1.25; 1,000 bushels at $1.30; white Michigan at $1.32½; 17 for fair to prime; 1,000 bushels at $1.35@1.36; 16,000 bushels at $1.37½@1.38; 2,000 bushels at $1.39; 1,000 bushels at $1.40; 2,000 bushels at $1.42½; 2,000 bushels at $1.45; 2,000 bushels at $1.47½; 1,000 bushels at $1.48; 2,000 bushels at $1.49; 1,000 bushels at $1.50; 1,000 bushels at $1.52½; 1,000 bushels at $1.55; 1,000 bushels at $1.57½; 1,000 bushels at $1.60; prime White at 60c. Barley nominally unchanged. Rye in fair request at 38@39c. Sales 200 bris at 40c; 200 bris at 39c; 200 bris at 38c; 200 bris at 37c; 200 bris at 36c; 200 bris at 35c; 200 bris at 34c; 200 bris at 33c; 200 bris at 32c; 200 bris at 31c; 200 bris at 30c; 200 bris at 29c; 200 bris at 28c; 200 bris at 27c; 200 bris at 26c; 200 bris at 25c; 200 bris at 24c; 200 bris at 23c; 200 bris at 22c; 200 bris at 21c; 200 bris at 20c; 200 bris at 19c; 200 bris at 18c; 200 bris at 17c;
